HIGHLIGHTED GLOWUP TECHNIQUES

Chin

[HIGH]

KEY: Chin projection + neck posture alignment

Chin filler is a highly effective non-surgical option for projection enhancement. Chin implants are a permanent alternative -- both require a board-certified surgeon.

Jawline

[HIGH]

KEY: Mastic gum chewing + neck/chin posture protocol

Jaw definition needs improvement. Mewing, mastic gum, and reducing submental fat are first steps. Consider a maxillofacial specialist consult for structural assessment. Chin/jaw filler is a minimally invasive option.

Eyebrows

[HIGH]

KEY: Brow mapping + microblading-free shaping

Consider a consultation with a certified brow artist. Microblading is an option for very sparse brows. A dermatologist can evaluate minoxidil for growth.

Eyes

[MEDIUM]

KEY: Under-eye depuffing + lash serum protocol

Consider an under-eye cream with retinol or vitamin C to address puffiness or dark circles. Cold compress in the morning helps significantly.

Cheeks

[MEDIUM]

KEY: Face yoga + cheeked bone definition

Reduce sodium intake and increase water to eliminate facial bloating. Gua sha and face yoga (cheekbone lifts) improve definition over 4 weeks.

Symmetry

[MEDIUM]

KEY: Mewing posture + sleep position correction

Mild asymmetry detected. Targeted facial exercises (cheek lifts, jaw stretches) can improve muscle balance. Sleeping on your back and correcting jaw posture are free and effective.

Lips

[MEDIUM]

KEY: Lip plumping hydration stack + cupid's bow definition

Hyaluronic acid lip balm helps with volume and texture. A dermatologist can discuss minimally invasive filler options.

Forehead

[MEDIUM]

KEY: Hairline framing + brow positioning optimization

Hairstyle choices can optically balance forehead height (fringe for long, volume at crown for short). Brow position is key -- well-arched brows reduce apparent forehead size.

4-WEEK GLOWUP STRATEGY PLAN

Your personalized 28-day transformation roadmap

Based on your male profile and areas scoring below 85/100

Chin (38/100)

WEEK 1 Days 1-7

Day 1-7: Practice chin-forward posture (not chin-up). This projects the chin and elongates the neck simultaneously. Photograph profile daily.

WEEK 2 Days 8-14

Day 8-14: Mewing and tongue posture strengthen the mentalis muscle which defines chin over time. Add chin-tap exercises (tap chin upward 20x).

WEEK 3 Days 15-21

Day 15-21: Reduce submental fat (double chin) with cardio + intermittent fasting if applicable. Kybella injections are FDA-approved for this.

WEEK 4 Days 22-28

Day 22-28: Chin filler is a highly effective non-surgical option for projection -- reversible, quick, and natural-looking. Book a consult to explore.

Jawline (46/100)

WEEK 1 Days 1-7

Day 1-7: Start mewing (tongue on palate 24/7). Cut sodium and processed foods. Begin chin-tuck exercises (10 reps x 3 sets daily).

WEEK 2 Days 8-14

Day 8-14: Add mastic gum (20-30 min daily -- genuine jaw workout). Add neck exercises (side tilts, chin presses). Apply caffeine cream to jawline.

WEEK 3 Days 15-21

Day 15-21: Lose 0.5-1kg body fat if applicable (jaw is highly fat-responsive). Add neck-to-jaw massage with ice roller each morning.

WEEK 4 Days 22-28

Day 22-28: Jawline is typically the fastest-responding feature to lifestyle changes. Results of 1-2 months compound. Consider kybella or filler consult if desired.

Eyebrows (48/100)

WEEK 1 Days 1-7

Day 1-7: Map your ideal brow with the 3-point rule (nose-to-eye-corner-to-brow tail). Use a brow pencil to test the shape without committing.

WEEK 2 Days 8-14

Day 8-14: Trim brows with scissors before tweezing. Apply castor oil to sparse areas nightly. Only tweeze hairs OUTSIDE your mapped shape.

WEEK 3 Days 15-21

Day 15-21: Add brow serum (peptides or minoxidil -- consult dermatologist first). Practice filling with feathery strokes vs block fill.

WEEK 4 Days 22-28

Day 22-28: Evaluate symmetry improvement. If gaps remain, consult a certified brow artist for lamination or tinting (non-permanent).

Eyes (55/100)

WEEK 1 Days 1-7

Day 1-7: Add caffeine eye cream (morning). Sleep 8h flat. Cut sodium to reduce puffiness. Cold spoon rolling under eyes each morning.

WEEK 2 Days 8-14

Day 8-14: Add Vitamin C serum under eyes (PM). Start eyelid exercises (look up-down without head movement, 3 sets x 20). Hydrate 2.5L/day.

WEEK 3 Days 15-21

Day 15-21: Apply retinol eye cream every 3rd night. Consider lash serum (castor oil is free -- apply with clean spoon weekly). Reduce screen time 1h before bed.

WEEK 4 Days 22-28

Day 22-28: Full eye care stack in place. Evaluate dark circles vs puffiness separately -- photograph in same lighting as Week 1.

Cheeks (59/100)

WEEK 1 Days 1-7

Day 1-7: Reduce sodium + alcohol (main causes of facial bloat). Add 2L water daily. Learn 'cheekbone lift' facial yoga (hold the lift 30 sec x 10).

WEEK 2 Days 8-14

Day 8-14: Gua sha upward strokes on cheeks (2 min each side, daily). Apply retinol to mid-face at night for collagen stimulation.

WEEK 3 Days 15-21

Day 15-21: Reduce body fat % through cardio -- cheeks are one of the first places fat loss shows. Add collagen powder to morning coffee.

WEEK 4 Days 22-28

Day 22-28: Cheek definition improvements from this protocol alone are typically 8-15%. Blush placement high on cheekbones optically lifts.

Symmetry (61/100)

WEEK 1 Days 1-7

Day 1-7: Sleep on your back (no pillow tilt), practice mewing (tongue on palate), take daily front-facing photos for baseline.

WEEK 2 Days 8-14

Day 8-14: Add facial massage (5 min gua sha morning + evening). Chew food equally on both sides. Fix posture with chin-tuck exercises.

WEEK 3 Days 15-21

Day 15-21: Add jaw-stretch asymmetry drills -- hold the weaker side 2x longer. Start scalp massage to reduce tension headaches that pull face.

WEEK 4 Days 22-28

Day 22-28: Full routine locked in. Compare to Week 1 baseline photos. Symmetry improvements of 5-12% are typical from posture alone.

GLOWUP COACH - COSMETIC GUIDANCE ONLY

This report is generated by an automated facial geometry analysis system. It is intended for EDUCATIONAL and COSMETIC GUIDANCE purposes ONLY. It does NOT constitute medical advice, diagnosis, or treatment.

The scores and ratings in this report are based on mathematical analysis of facial landmark proportions (symmetry, proportions, geometry) and do NOT reflect any medical assessment of your health, beauty, or worth as a person.

BEFORE making any decisions regarding cosmetic procedures, dermatological treatments, or surgical interventions, you MUST consult a qualified and licensed professional:

- Dermatologist | Plastic or Cosmetic Surgeon | Maxillofacial Surgeon
- Ophthalmologist (for eye-related concerns) | General Healthcare Professional

Results may vary based on lighting conditions, camera angle, facial expression, and the inherent limitations of computer vision technology. This report should NOT be used as a basis for comparison with others or as a measure of self-worth.

All facial imagery captured during analysis is processed entirely in real-time in your browser and is NEVER stored, transmitted, or shared. Only numerical metrics are retained with your explicit consent.
